

CS 341: Web Technologies

LAB EXERCISE 3 (Friday, 17th September 2021)

[20 POINTS]

Instructions: This lab aims to guide you to think about the Web Content Structure and Web Content Presentation.

You are to complete this lab in a team of **four students**. Take note that this team will be used for your labs as well as your team projects this semester. **Ashesi Honour Code applies here!**

Submission: By 11:55pm on Sunday 19th September 2021

Questions

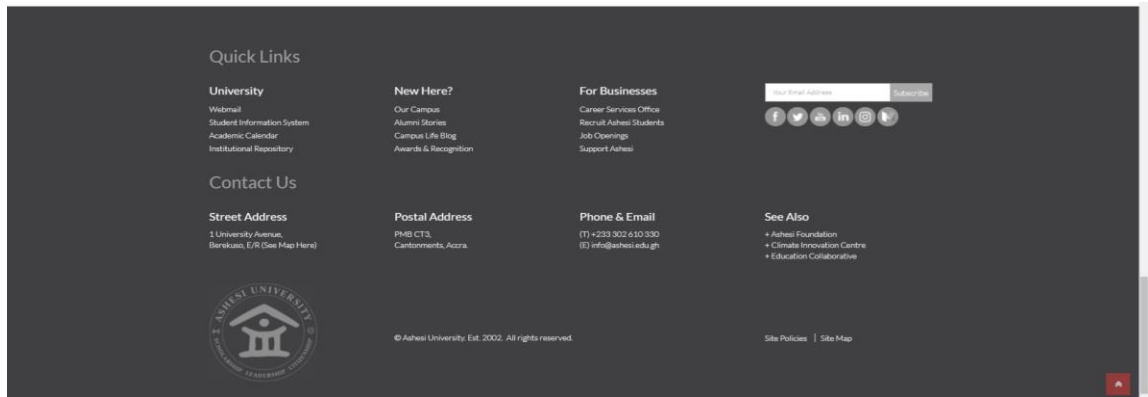

1. **[25 points]** You are tasked as the new Web Developer for Ashesi University to recreate the current Ashesi University's website at <https://www.ashesi.edu.gh>. Refer to image below:

Do understand that your task requires you to develop only the landing page (i.e. index.html) of the Ashesi University website. Since we have discussed and practiced with HTML 5 and CSS in class, you are expected to use HTML 5 elements/tags and

relevant attributes and appropriate styling to enhance the presentation of the website as close as possible to Ashesi University's landing web page:

- [8 points] Enhance the navigation bar.
- [2 points] Introduce a hyperlink for "*Ashesi's 2020 Annual Report*" (on line 1 of second paragraph) using an actual URI to this article.
- [10 points] Style the footer to look as close as possible to the actual footer on Ashesi University's website. Refer to image below:

NB:

- Do not use JavaScript to affect the presentation and behaviour of the web page.
- Ensure you validate your HTML5 code with [The W3C Markup Validation Service](https://validator.w3.org/).
